STUDY

The League arrives at its positions through research, study, and a process of member agreement.

RESEARCH

As soon as a new issue is chosen by the membership, we go after the facts. We draw on a variety of pro-con materials, develop our own resources, turn to experts and public officials for information, directly observe facilities and institutions, and draw the community into the decision making process.

UNIT STUDY

The study material is produced and mailed to each member, who then may take part in unit discussions. Each member of the study group has the opportunity to express an opinion in coming to consensus.

CONSENSUS

Results of the unit meetings are compiled and discussed at a League monthly meeting. Consensus is arrived at and becomes the basis of League position and action. This process is followed at local, state and national levels.
